

## Creating your own Books

The Reading Our Way program gives you two books for the first two sets of words in the Beginner, Intermediate and Advanced kits. Beyond this we encourage educators to create personalised books. These can contain photos of the learner, images of items or themes the learner finds interesting and significant. Have the learner assist in the process of both choosing images and writing the text. Ensure the content of the books contain the words in which you are focusing on and previously studied words. Below is a suggested site to create your own books that you can print or access as an e-book.

Go to the following website and select 'book wright', this particular website offers a free downloadable program for you to create your books. The program is easy to use and navigate.

Once you have downloaded the program navigate your way through the page:
