

Extra Extension Activities

Bubble words

Used during the matching/choosing/naming phases, learners pop matching words or words you ask them to locate, or you point to a word and ask them what it is before they can pop it. A great game for sensory learners.

Find a word

Used during the matching phase, learners find words that match words on their lists and highlight them selected colours. You can also do the choosing and naming phase once this is completed. A great game for learners who need to be challenged.

Hoop-a-word

Used during the choosing phase, learners need to shoot a ball through the hoop of the word you have selected. A great game for learners who are active.

connect word

Used during the matching phase, learners match words written on the connect four pieces. Alternatively, learners spell out words to connect sight words with phonics. Great game for learners who need extra scaffolding.
